

Style Sheets

THE EASY WAY TO STYLIZE YOUR WEB PAGES

CSS is an easy way to effect sweeping stylistic control in your web pages without much effort.

Cascading Style Sheets(CSS)

Note: a:hover MUST come after a:link and a:visited in the CSS definition in order to be effective. Line-height attribute is the space between the consecutive lines. Text transform attribute capitalize the first letter of each word whereas font-variant attribute with value small-caps capitalizes smallcase also but the size of smallcase letter is smaller than uppercase letters.

.NOTE: A:ACTIVE MUST COME AFTER A:HOVER IN THE CSS DEFINITION IN ORDER TO BE EFFECTIVE
